

STEP 2 Cultivating Sustainable Abundance

A Two-Day Retreat
June 29-30, 2017
Ashland, MA

Enough already!
It is time for a world that works for all.

Be part of a growing movement that takes a stand
for an idea whose time has come.

Cultivating Sustainable Abundance

If you:

Want to debunk the endemic myths of scarcity and fear that pervade;

Insist that your work contribute to the greater good
of your enterprise as well as our human community,

Have an appetite to create something great,
and know it requires going beyond what you already know,

Are committed to a world where everyone matters and know we must re-invent our
organizations and communities.

Come Join Us

You will learn to use cutting edge and exciting distinctions and practices that will allow your clients, teams, faith communities and students to:

Break free from the 'reverie of lack'—lack of time / money / resources / talent / attention / love that pervades the atmosphere of our lives and our enterprise.

So people can:

Thrive / Trust / Generate great prosperity of all kinds / Become sustained and sustainable in how they live and work / Love fiercely and boldly / Be here NOW

This work permanently alters
people's lives and relationships.

As part of our two days we will:

- 1 Reveal a fresh framework about power, action, learning, and love that is the basis for our leadership model.
- 2 Debunk the myths of individualism, hard work, struggle, and scarcity, and reveal how this pervasive culture makes effective leadership impossible.
- 3 Guide you to support human beings to move beyond habitual personal barriers to power, creativity and gratitude.
- 4 Build a new foundation for learning you can use the rest of your life by equipping you with distinctions, exercises and practices you can use in many ways with many different kinds of people to forward their growth and strengthen your communities.

Cultivating Sustainable Abundance

Sustainable Abundance
is our birthright. Now is
our time to reclaim it.
